

MOUNTING SUGGESTIONS:

Indian Chieftain/ Roadmaster models 2014-2017 One-piece Wide Tripper™ Seat

Hardware (included):	Amplifier relocation bracket Plastic spacer 8mm x 15mm buttonhead bolt Black nylon washer
-----------------------------	--

Tools needed:	5mm Allen wrench Metric and Torx sockets Torque wrench
----------------------	--

Removal of Stock Seat:

Please refer to owner's manual for seat removal instructions.

This can be found online at:

<http://www.indianmotorcycle.com/en-us/owner-resources>

Installation of Mustang seat:

1. To relocate the amplifier if necessary, remove the two T-25 Torx bolts from the stock mounting bracket, and mount the amplifier to the supplied bracket. Remove the two M6 bolts holding the stock mounting bracket to the bike. Using one of these M6 bolts, mount the bracket with the amplifier through the plastic spacer and into the hole on the left side of the frame.

2. Position the seat onto the frame. Ensure the front brackets of the seat engage the mounts toward the front of the motorcycle.

3. Push the seat fully forward until the rear bracket aligns with the fender mount and, using a 5mm Allen wrench, secure to the fender with the stock rear screw, grommet and washer, or the provided 8mm x 15mm bolt and washer. Indian recommends torquing this bolt to 8 ft-lbs (96 in-lbs, 10.8 Nm).

Enjoy the comfort and custom look of your new Mustang seat!

These steps are guidelines to help you install your new Mustang product. If you need further assistance, please call us at 800-243-1392 or 413-668-1100, Monday through Friday 9:00 - 5:30 Eastern or send an e-mail to questions@mustangseats.com or visit our website at www.mustangseats.com.
