

MOUNTING SUGGESTIONS:

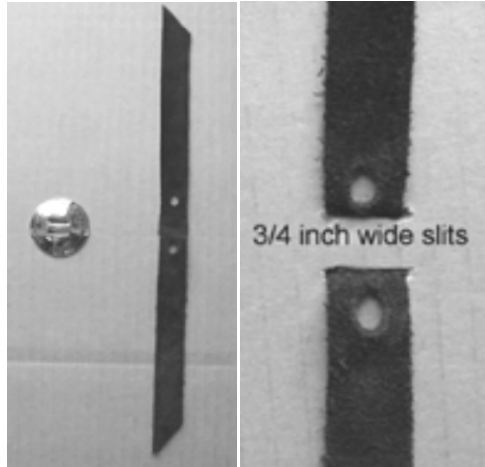

Replacement Conchos for Mustang Seats Installation Kit

Conchos are custom-made from heavy die-cast zinc, not a thin stamping, and include a genuine leather strap. The conchos are available in two sizes.

- Small Concho - used for sissy bar pads - 32 mm (1-1/4") diameter with leather strap
- Large Concho - used for seats and tank bibs - 41 mm (1-5/8") diameter with leather strap

Installation:

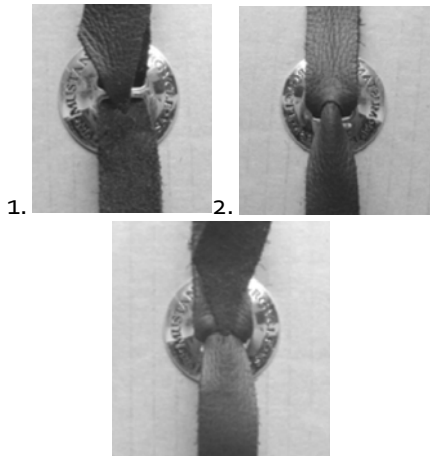

1. Position concho strap with the rough side of material facing out as shown.
2. Insert concho strap through slits in seat so that round holes in strap are positioned above and below slits. **NOTE: If the seat material does not have pre-cut slits, you must cut them to the dimension shown in photo.**
3. Slide upper portion of concho strap through the upper slot in concho from behind. Slide lower portion of concho strap through the lower slot in the concho in a similar manner. Pull strap ends tightly enough for the two holes in the strap to be visible.

4. Insert tip of upper strap into lower hole in concho strap and pull through tightly (fig.1). Lower has now become the new upper strap (fig. 2).

5. Insert tip of new upper strap end into the unused lower hole in the concho strap and pull through tightly.

6. Finished product should display one smooth side and one rough side of the concho strap.

These steps are guidelines to help you install your new Mustang product. If you need further assistance, please call us at 800-243-1392 or 413-668-1100, Monday through Friday 9:00 - 5:30 Eastern or send an e-mail to questions@mustangseats.com or visit our website at www.mustangseats.com.
